Critical-Care Pain Observation Tool

Selection criteria of articles as used in the PAD guidelines:

- a) English manuscripts; published or in press
- b) Adults >18 years old
- c) Sample size >30
- d) Excluded: abstracts, editorial, narrative reviews, case reports, and letters to the editor

Articles included in the PAD guidelines:

Note: This paper was included as it was the only other one available published by someone else. The sample size was of 24 participants.

Articles added in the recent pain tool review (published In Seminars In Respiratory & Critical Care Medicine: Gélinas et al., 2013):

Lee KI, Oh HS, Suh YO, Seo WS. Patterns and clinical correlates of pain among brain injured patients in critical care assessed with the critical care pain observation tool. Pain Management Nursing. In press and available online doi:10.1016/j.pmn.2011.05.005
